

SAFETY FLOORING PRODUCTS

FIREGARD SAFETY SERVICES LTD

ANTI-SLIP PRODUCTS

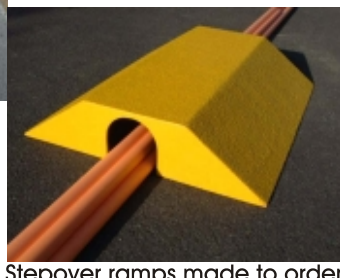

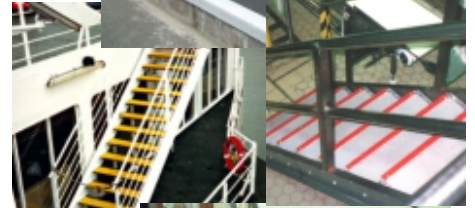

Our GRP anti-slip stair, floor and ladder covers are easy to fit and can be used immediately.

For stairs, walkways, floors, ladders, ramps and inclines.

Corrosion proof, weatherproof lightweight and strong.

Offshore, marine, industrial and all utility sectors.

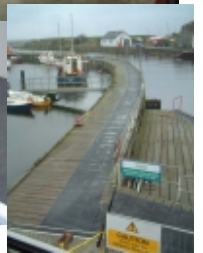

Tough, long lasting and reliable, safe in any area.

Stepover ramps made to order.

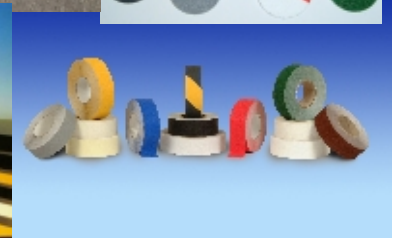

DDA compliant

Prevent slips and falls

ANTI-SLIP TAPES

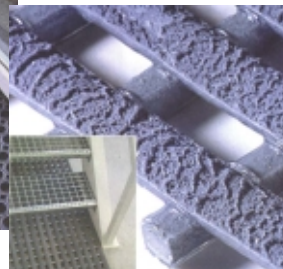

- Wide range of self adhesive tapes and markers.
- Any width of roll up to 1 metre. Special "aqua" options, or photoluminescent for added safety.
- Various colours and grades to suit most requirements.
- Fast, economical solution for problem floors.

SAFETY MATS

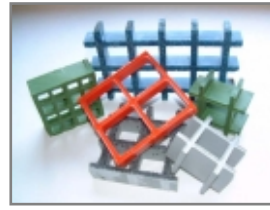

We also offer a full range of safety mats, entrance mats, rubber mats, interlocking floor tiles, anti-fatigue mats and industrial flooring.

Contact our Sales Office for further details on any of our products

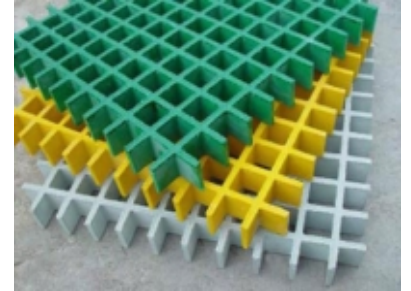

GRP GRATING AND HANDRAILS

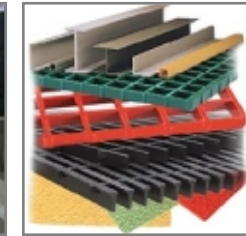

- Lightweight and maintenance free
- Weatherproof, corrosion resistant
- Safe and secure gritted Anti-Slip surface
- Easy to install never needs painting

Stairways, ramps, platforms, mezzanines or walkways can all be fabricated in GRP materials for a lightweight but immensely strong long-term facility. Due to the physical properties of GRP, it is the most effective solution for virtually any access structure application.

**OFFSHORE • MARINE • PETROCHEMICAL
WATER • INDUSTRIAL • POWER**

**COST EFFECTIVE
LIGHTWEIGHT
SIMPLE INSTALLATION**

- Bi-directional strength, cut and lay in any direction.
- Reduced wastage on cut panels.
- Lower weight reduces installation costs, no heavy lift craneage or large manpower teams required.
- High strength to weight ratio.
- Needs only portable hand or power tools (no welding).
- UV resistant.
- Maintenance free - never needs painting.
- Resistant to fire and chemical spills.

GRP LADDERS AND STRUCTURES

Lightweight yet extremely tough and resilient GRP ladders and safety cages, suitable for all applications and environments. Corrosion resistant and completely maintenance free. Highly resistant to chemical spillages and extremes of weather. Unique "Safe Grip" rung profiles for operator safety and confidence. Rungs will withstand up to 250kg load.

- Easily outlasts metal ladders
- Conforms to BS4211 and BS5395 part 3.
- Any height of ladder can be supplied with safety cage and "rest station" options.
- Can be supplied as a conventional portable ladder if required.

SAFETY GATES

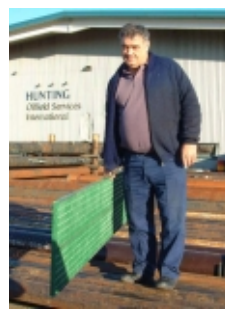

Self-closing design. Very strong and durable construction. Corrosion proof and maintenance free polyurethane. For ladders platforms and machine access. Offers a vital "safety at height" benefit.

PIPEWALK

Eliminates slip risks when crossing pipe or casing stocks. Easy one-man operation. Stays firmly in place on any pipe or casing stack. Positive gridded Anti-Slip surface. Unique locator locking feature. Class 1 equivalent fire rated.

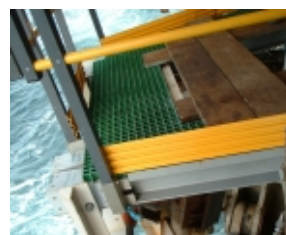

SPECIAL FABRICATIONS

We offer a fabrication service for special applications or requirements, using GRP materials, for strength and maintenance-free reliability.

"Pigpen" Rotary guard .

ACCESS & WORK STATIONS

Produced in kit form for easy self assembly with full instructions and all fasteners. These offshore projects enabled a safe working facility in high risk areas, improving efficiency and operator safety and security.
