

FIREGARD FIREFIGHTER GLOVES

Fully protective leather firefighter glove

EN659:1995

A full, 5-finger leather glove designed to provide comfort, performance, and dexterity for the industrial firefighter. Constructed with a high grade, soft yet durable leather shell exhibiting excellent resistance to abrasion, cuts, heat, and water penetration. The glove features a mixed fibre flame retardant insulating liner, and inherently flame retardant knitted wristlet to provide a snug fit and anti-debris feature.

| | | |
